

## CMDDA1 Carbon Monoxide Training and Assessment LCC

### Course Overview

This training will help gas installers do the necessary gas safety assessment. It covers reported potential carbon monoxide or gas leaks. You will learn theory during the training in a purpose-built room. We will take you through any industry updates that have occurred since your last renewal. The training will also cover processes. These include using a CO/CO gas analyzer. It helps to determine compliance with appliance rules. You will learn the type and style of knowledge questions. You will answer these questions during an assessment and explain the best methods.

### What you will learn

It covers the changes to laws, norms, and work habits. This is after taking the last ACS assessment. You will learn how to use the necessary documentation. It will help you complete the assessments you need to do. All learners will also do hands-on gas safety installations. This will acquaint you with the types of gas leaks you may not see every day. These include open-flued boilers, gas fires, and range cookers.

### Entry Requirements

This course is for learners who are already Gas Safe qualified and are looking to add these carbon monoxide safety requirements and qualifications.

### How you will be assessed

Assessments will be formative practical skills and a knowledge question paper.

### Course Fees

This is a full cost course. There is no fee remission available and you cannot apply for an advanced learner loan to pay for your fees.

### Course Progression

To add to work and career suitability, Gas Safe registration is the next step. This is ideal for those who have finished their carbon monoxide safety assessment. This will open up opportunities for you to do more work. Liquid Petroleum Gas is popular. It aligns with natural Gas and expands the work an engineer can offer.

### What Happens Next

Apply online via the College website. You will be contacted to attend an interview if required, or you will be sent a conditional offer according to the entry requirements for the course. You will then be invited in to enrol for your chosen course of study. For enrol and pay courses: Once you have decided to take the course, you need to fill in a short learner details form online and pay the course fee. Once you have done this, you will receive an electronic confirmation of enrolment and payment.
