

Extra ACS Gas Training

Course Overview

This is a one-day additional core gas safety training in particular cases for bespoke installation, service, and maintenance training and re-cap programme. The engineer at the end of this training will be suitably skilled to undertake a Core Gas Safety Assessment (separate course). Additional Technical and practical skills will be gained during training but the substantive skills will have been gained onsite with a Gas Safe operative. This is a full-cost course. There is no fee remission available and you cannot apply for an advanced learner loan to pay for your fees.

What you will learn

Additional core gas safety training and practical skills training, aimed at covering particular areas of installation and maintenance of pipework, boilers, cookers, fires and water heaters. A period of on-the-job experience is required to enable progression to the ACS CCN1 assessments in order to become Gas Safe registered. Undertaking work experience (with a Gas Safe registered operative) is an essential part of the course. This ensures that that onsite experience coupled with the college training to enable the learner a Core Gas Safety assessment (separate course) and become Gas safe Registered.

Entry Requirements

This particular one-day programme is for candidates currently working in the central heating and gas industry, or candidates who are progressing into a plumbing, central heating, and Gas career, the awarding organisation BPEC (British Plumbing Employers Council) has a mandatory requirement of working alongside a qualified and registered Gas Safe Engineer. Learners will also need to be able to study at L2/3 due to the technical discipline of the course. Being able to read and digest technical texts is a key part of the learning programme

Course Fees

This is a full cost course. There is no fee remission available and you cannot apply for an advanced learner loan to pay for your fees. Please contact nhall@leicestercollege.ac.uk for current course fees

Course Progression

You will be registered as a Gas Safe operative. Domestic gas installation, maintenance or repair. Possible progression could also be to liquid petroleum gas or commercial and industrial gas engineer. Self employment or working for a suitable registered company is a route many learners who complete the qualification take or employment within the Gas industry.

What Happens Next

Apply online via the College website. You will be contacted by nhall@leicestercollege.ac.uk to attend as required, or you will be sent conditional date offers according to your requirements, and availability of the course. You will then be invited in to enrol for your chosen course training. For enrol and pay courses: Once you have decided to take the course, you need to fill in a short learner details form online and pay the course fee. Once you have done this, you will receive an electronic confirmation of enrolment and payment.
